Senior Front End Developer

Experienced Full Stack Developer with 6+ years of expertise in front-end and back-end development. Currently specializing in full-stack solutions at LiveTesting while maintaining deep expertise in Angular, React, Vue, and Next.js. Proven track record of enhancing user interfaces, improving conversion rates by up to 80%, and delivering scalable, high-performance applications across various industries. Strong background in team leadership, mentoring, and modern development practices.

WORK EXPERIENCE

Senior Full Stack Developer

Currently developing full-stack solutions and comprehensive testing applications

LiveTesting

İzmir, Turkey • 01/2025 - Present

- Developing end-to-end applications using modern full-stack technologies
- Building robust back-end APIs and database architectures
- Creating responsive, user-friendly front-end interfaces (React, Next.js, Vite, Angular)
- Implementing comprehensive testing strategies and quality assurance processes

Senior Front End Developer

Testinium | Loadium

Istanbul, Turkey • 01/2021 - 12/2024

- Led and mentored front-end team of 5-10 developers, driving development of SaaS products including Testinium, Loadium, and Cunda
- Designed and developed interactive user interfaces from scratch using Angular (versions 7-20+), SCSS, and TypeScript
- Managed Angular version upgrades ensuring smooth transitions and handled CI/CD deployment processes using AWS and NPM
- Implemented Web Session Listener (RrWeb) and enhanced UI/UX design contributing to major project success
- Spearheaded landing page creation and conversion optimization resulting in improved user engagement and 80% higher conversion rates
- Collaborated with cross-functional teams and backend developers to resolve technical issues and optimize performance

Jr. Front End Developer

Kılıç Holding

Bodrum, Turkey • 01/2019 - 12/2020

- Developed responsive websites using Angular, Django, Python, and Node.js technologies
- Worked with outsourced teams on AFAD Help and Now Fish Time projects
- Improved conversion rates by 80% through design enhancements
- Collaborated with backend developers to resolve front-end integration issues

EDUCATION

B.S. Computer Engineering in Engineering Department

Muğla Sıtkı Koçman Üniversitesi • GPA: 2.9/4.0

Mugla, Turkey • 09/2016 - 06/2021

B.S. Computer Engineering

Muğla Sıtkı Koçman University • GPA: 2.9/4.0

Mugla, Turkey • 09/2016 - 06/2021

PROJECTS

LiveTesting Platform 01/2025 - Present

Full-stack development of comprehensive testing solutions platform with modern architecture and scalable infrastructure.

Testinium (Testinium.io)

Test automation planning, reporting, and management interface. Contributed to Angular 11 development and debugging processes.

Loadium (Loadium.io)

Load testing platform allowing comprehensive test management and reporting. Improved performance and stability while transitioning from Angular 12 to 15.

Cunda (Cunda.ai)

AI-based machine learning project for test automation scenarios. Contributed to Angular 14 development and created RrWeb scripts for enhanced functionality.

SanderYaz

I provide work for freelance and outsource projects in my projects with the main domain Sanderyaz.com. As a freelancer, I have completed 25+ frontend projects and 10+ mobile application and unity projects. Examples from projects: Azazel (Horror Fps Game), Farmer (Android Mobile App), Logistics (Landing App), SY Messenger (Android Messenger App).

SanderYaz Freelance Projects

Completed 25+ front-end projects and 10+ mobile/Unity applications including Azazel (Horror FPS Game), Farmer (Android App), and SY Messenger.

SKILLS

Front-End Development: AngularJS 1.x, Angular (Versions 7-17), Cross-Browser Compatibility, CSS, CSS3, HTML, HTML5, JavaScript, jQuery, Next.js, Node.js, React, Responsive Design, SASS, SCSS, TypeScript, Vue

Development Methodologies: Agile (Scrum), CI/CD Pipelines, Continuous Integration/Continuous Deployment, Cross-Browser Compatibility, Detail-Oriented Development, Docker, GIT, GraphQL, NPM, RESTful APIs, TDD/BDD, User-Centric Development

Project Control & Other Technical Skills: Code Reviews & Pair Programming, Collaborative Development, Problem Solving and Analytical Thinking, Project Management and Prioritization, Team Leadership and Mentoring

UI/UX Design: A/B Testing, Accessibility (WCAG), Figma & Adobe XD, Performance Optimization

Back-End Development: Database Management, Django, GraphQL, Node.js, Python, RESTful APIs, Server Architecture

Development Tools & Practices: Agile (Scrum), AWS, Azure, CI/CD Pipelines, Docker, GCloud, Git, NPM, Performance Optimization, TDD/BDD

UI/UX & Design: A/B Testing, Accessibility (WCAG), Adobe XD, Figma, User-Centric Development

CORE COMPETENCIES: Client Relations, Code Quality, Continuous Learning, Problem Solving, Project Management, Team Leadership & Mentoring
