Sander YAZICIOĞLU

Senior Full Stack Developer

Istanbul (Asian side), Turkey | +90 539 639 29 00 | sanderyaz@gmail.com
linkedin.com/in/SanderYaz | github.com/SanderYaz | sanderyaz.com

PROFESSIONAL SUMMARY

I build full-stack products end to end: APIs, polished interfaces and the automation that keeps them reliable. Full-stack developer with 6+ years of shipping SaaS products. At LiveTesting I own the backend, frontend and Appium-based device automation. Before that I led a 5-10 person front-end team at Testinium building Testinium, Loadium and Cunda. I care about clean architecture, fast interfaces and getting real work into production.

CORE SKILLS

Frontend: Angular, React, Next.js, TypeScript, Vue, SCSS, Tailwind CSS, HTML5 / CSS3

Backend: Node.js, REST APIs, GraphQL, WebSocket, Python, Django, Database design

Testing & automation: Appium, Device farms, RrWeb, TDD / BDD

Cloud & DevOps: Docker, CI/CD, AWS, Azure, Google Cloud, Cloudflare, Git

AI: LLM integration, Tool-calling, Agent orchestration, Prompt versioning

Practices: Agile / Scrum, Code review, Mentoring, Accessibility (WCAG), A/B testing, Figma

WORK EXPERIENCE

Senior Full Stack Developer

LiveTesting • İzmir, Turkey • 01/2025 - Present

Building a real-device testing platform end to end, from backend to UI.

- Designed and built the product's backend and frontend architecture as a full-stack engineer.
- Built end-to-end Appium test run flows and a plugin structure for device automation.
- Shipped performance work across realtime device monitoring, reporting and device management.
- Took LLM flows to production with prompt versioning, tool-calling and agent orchestration.

Technologies: Node.js, TypeScript, React, Angular, Appium, WebSocket, LLM

Senior Front End Developer · Team Lead

Testinium | Loadium • Istanbul, Turkey • 01/2021 - 12/2024

Led the front-end team behind the Testinium, Loadium and Cunda SaaS products.

- Led and mentored a front-end team of 5-10 developers.
- Built enterprise Angular interfaces from scratch and drove upgrades from Angular 7 to 20+.
- Owned build and CI/CD pipelines on AWS and NPM.
- Built a Web Session Listener with RrWeb; landing page work lifted conversion by 80%.
- Migrated Loadium from Angular 12 to 15, improving the product's performance and stability.
- Built RrWeb session recording scripts for Cunda, an AI-based test automation product.
- Worked with backend and cross-functional teams to resolve technical issues and optimize performance.

Technologies: Angular, TypeScript, SCSS, RrWeb, AWS, CI/CD

Jr. Front End Developer

Kılıç Holding • Bodrum, Turkey • 01/2019 - 12/2020

Built responsive web projects with Angular, Django and Node.js.

- Worked with outsourced teams on the AFAD Help and Now Fish Time projects.
- Improved conversion rates by 80% through design improvements.
- Coordinated integration and bug fixing with backend developers.

Technologies: Angular, Django, Python, Node.js

KEY PROJECTS

LiveTesting | livetesting.testinium.com
Live testing and QA platform. Full-stack ownership: Node.js APIs, React and Angular UI, realtime device monitoring over WebSocket, Appium automation and LLM agent flows.

DevicePark | devicepark.testinium.com
Real-device testing platform and device farm management with Appium, Docker and WebRTC.

Loadium | loadium.com
Performance testing SaaS with test management and reporting. Led the front end and the Angular 12 to 15 migration.

Testinium | testinium.io
Test automation planning, reporting and management interface built with enterprise Angular.

Cunda | cunda.ai
AI and machine learning product for test automation scenarios. Angular development and RrWeb session recording.

SIDE PROJECTS

- **SanderOS:** This site: a retro desktop in the browser with games, a terminal, two AI companions and TR/EN support.
- **OpenClaw Digital Twin:** Digital twin scenarios on OpenClaw that model real device behavior in controlled environments.
- **Active Farm Management:** Ran a live server-side device farm, managing device resources and test distribution.
- **SanderYaz Studio:** 25+ front-end and 10+ mobile/Unity projects, including Azazel (horror FPS), Farmer and SY Messenger.

EDUCATION

B.S. Computer Engineering
Muğla Sıtkı Koçman University • 2016-2021 • GPA 2.9/4.0

CERTIFICATIONS

- Angular: Advanced Level (2022), Udemy
- Certificate of English Proficiency, School of Foreign Languages

LANGUAGES

Turkish (native), English (professional working proficiency)
